

Magnetic Card Reader/Writer AL4777

General

The AL4777 is a reliable and cost-effective replacement for all models (with or without encryption) of the IBM4777 (AL4777) Magnetic Stripe Reader / Encoder (MSR/ MSRE).

HCC4777 MSRE can be directly applied to an IBM financial work station (PC), work with the IBM LANDP and CT financial system without any change of hardware and software.

AL4777 MSRE performs reliable and accurate, has a beautiful and firm cover of zinc alloy.

Specification

<p>AL4777 Mag-stripe Reader/Encoder (IBM4777)</p>	<p>They can connect to PS/2 port or serial port (RS232) of PC, easy to use. Produced with advanced technologies and designs, ensured its reliability. Adopted multi-CPU system and intelligent encode/decode technology, guarantee the quality of encoding and the sensitivity of decoding, solved the compatibility of magnetic cards. High reliability and precision of encoding synchronizer, long endurance of Fe-Si-Al read/write heads, guarantee the high success rate of access and long lives of the equipments.</p>
<p>ALL4778 PIN Keypad (IBM 4778)</p>	<p>Designed special shield and beeper for financial system, 3optional modules can be appended: Sound Prompt Module: Especially suitable for bullet-proof window room DES Encryption Module: Encrypt your information into the card, safer on financial transactions. LCD Module: Display "*" as you type, in case the errors from keypad tremble or linking. Mainly for financial electronic industry. Price is negotiable.</p>
